YEAR 12 – SUBJECT OFFERING

COMPLETION, SPECIALISATION, AND TRANSITION

ESSENTIAL ENGLISH UNIT 3 & 4

(4 QCE POINTS)

Essential English develops and refines students' understanding of language, literature and literacy to enable them to interact confidently and effectively with others in everyday, community and social contexts. The subject encourages students to recognise language and texts as relevant in their lives now and in the future and enables them to understand, accept or challenge the values and attitudes in these texts.

SPORT & RECREATION UNIT 3 & 4

(4 QCE POINTS)

Sport and recreation activities are a part of the fabric of Australian life and are an intrinsic part of Australian culture. These activities can encompass social and competitive sport, aquatic and community recreation, fitness and outdoor recreation. For many people, sport and recreation activities form a substantial component of their leisure time. Participation in sport and recreation can make positive contributions to a person's wellbeing.

ESSENTIAL MATHEMATICS UNIT 3 & 4

(4 QCE POINTS)

Essential Mathematics develops skills that go beyond the traditional ideas of numeracy. Students will see mathematics as applicable to their employability and lifestyles and develop leadership skills through self-direction and productive engagement in their learning. Students will gain an appreciation that there is rarely one way of doing things and that real-world mathematics requires adaptability and flexibility.

SOCIAL & COMMUNITY STUDIES UNIT 3 & 4

(4 QCE POINTS)

Social & Community Studies fosters personal and social knowledge and skills that lead to self-management and concern for others in the broader community. It empowers students to think critically, creatively and constructively about their future role in society. The focus on social relationships includes concepts and skills to assist students engage in constructive interpersonal relationships, as well as participate effectively as members of society, locally, nationally or internationally.

SCIENCE IN PRACTICE

Science in Practice provides opportunities for students to explore, experience and learn concepts and practical skills valued in multidisciplinary science, workplaces and other settings. Learning in Science in Practice involves creative and critical thinking; systematically accessing, capturing and analysing information, including primary and secondary data; and using digital technologies to undertake research, evaluate information and present data.

FLEXIDAY

Students are timetabled to be on-site four days of the week, with one day assigned as a ‘flexi-day’ option. The flexi-day allows students to attend registered training at local institutions, and/or participate in work placement, school-based traineeship or school-based apprenticeship. Students not enrolled in external training can utilise the flexi-day to obtain additional teacher-guided assistance and/or complete work missed due to absence.

VET AND PATHWAYS

Vocational Education and Training (VET) encompass certificate courses with registered training organisations, University entry courses with guaranteed placements, work-ready skill development and school-based traineeships and apprentices. These opportunities provide students with experience and qualifications in career pathways suited to their interests.

The Pathways Program also includes work experience that partners with local businesses to support student exploration of different industries and types of employment.

Completion of all VET courses contribute QCE points.
